

Stay ahead with
Professional
Service Level Protection

Optimise your OEE with the ERIKS Smart Asset Management platform and our Professional service level to provide real-time monitoring, predictive maintenance alerts, and actionable insights, helping you minimise downtime and maximise asset performance.

Achieved with a combination of our unique cloud-based asset management platform, an expert team of technicians, allowing us to deliver critical, actionable insights to keep your machines operating at optimum efficiency.

Tailored Sensor Network. ERIKS design and deploy a custom sensor network tailored to your assets to ensure optimal fault diagnosis and data quality for the earliest and most accurate warnings.

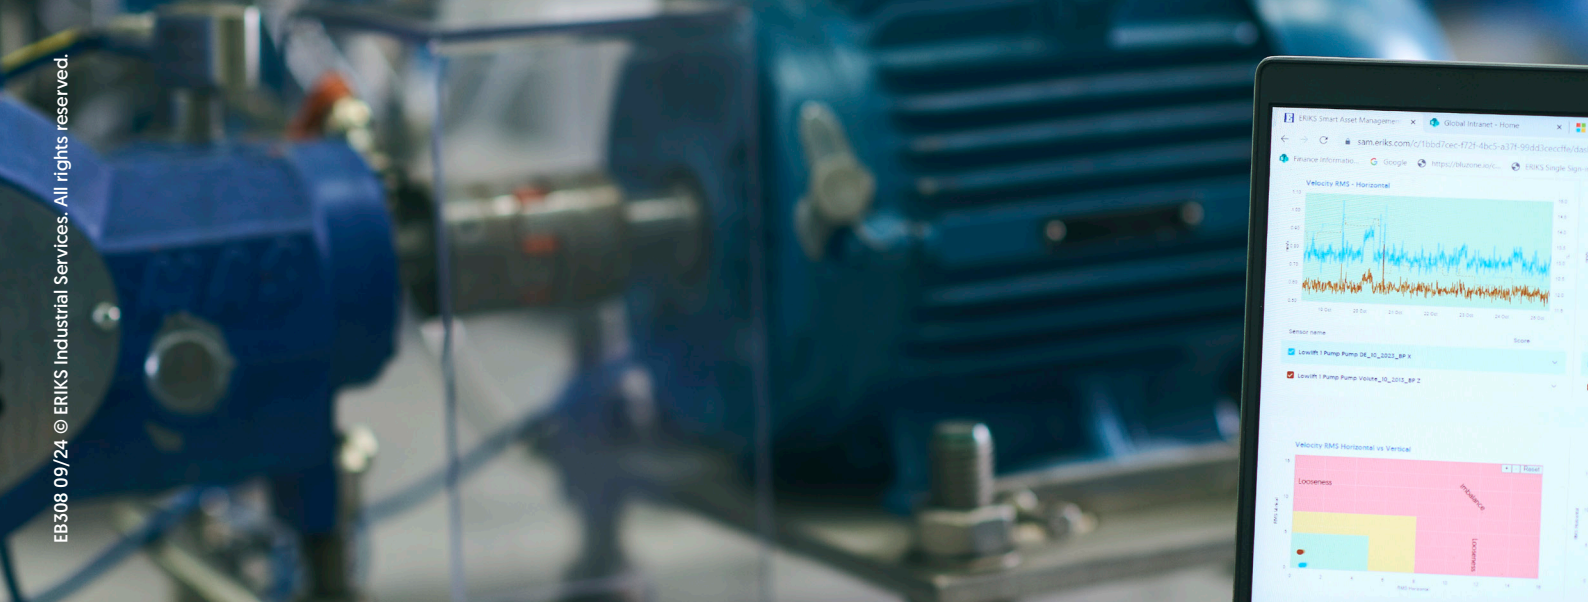

Powerful Reliability Dashboard. The powerful data engine and smart algorithms offer potential causes and solutions with intuitive visual information, presented in an easy-to-use dashboard environment. Full detailed analytics for advanced users is behind the dashboards. [See over leaf for full details].

Where uptime is critical, the Professional package is our most complete offering supported by ERIKS expertise

- From 20 sensors minimum, 3 year contract
 - Powered by ERIKS innovative SAM dashboard
 - Algorithmic data analysis and actionable insights
 - Data collection frequency from every 2 mins
 - Documentation management capabilities
 - Three 1-hour onboarding and training sessions
- ERIKS designed, installed & commissioned sensor system
 - Proactive ERIKS monitoring and maintenance support, our experts oversee your assets, converting insights into actionable solutions. You gain priority access to our engineering teams and workshops, who swiftly address issues, turning amber warnings into green lights.

Let's make industry work better

ERIKS

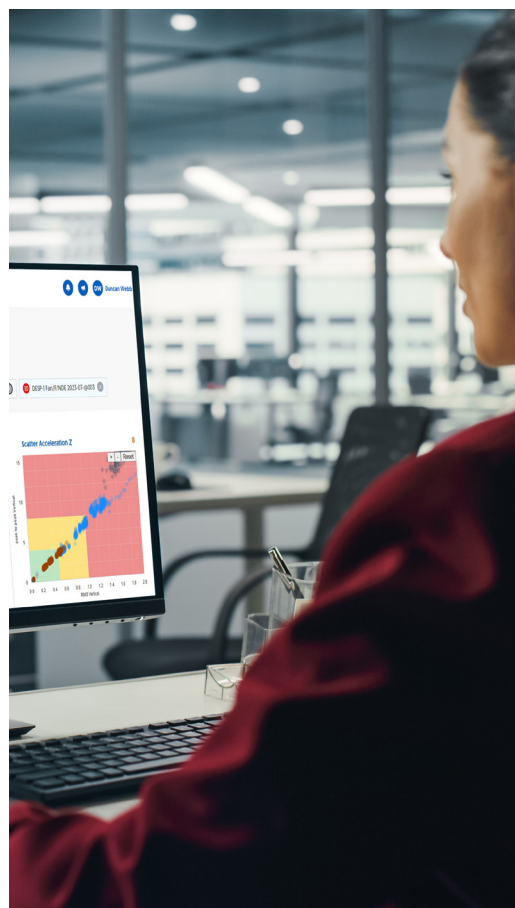

ERIKS SAM Reliability Platform: Powering Manufacturing Excellence

Experience the future of condition monitoring with the ERIKS Reliability Platform, a cloud-based tool featuring sophisticated analytics and an award-winning dashboard, the platform offers:

- **Algorithmic Data Analysis:** Harness powerful data engines, ensuring precise insights.
- **Live Status Monitoring:** Stay informed with real-time updates on equipment conditions.
- **Condition Scores:** Understand equipment health at a glance with intuitive 1 to 10 condition scores and colour coding.
- **Smart Maintenance Alerts:** Receive timely alerts for proactive maintenance.
- **Diagnosis and Suggested Actions:** Benefit from smart algorithms that provide potential causes and actionable solutions.
- **Central Repository:** A digital register for all assets, with a history and certification repository for streamlined documentation.

Designed to be simple and intuitive, whether online or offline, the ERIKS SAM Platform empowers you to take smart, actionable insights to optimise performance and minimise downtime.

Call 0121 508 6000 or visit www.eriks.co.uk

Available 24 hours a day, 365 days a year for emergency service.
